EXPERIENCE

Belfox Technologies, Owerri, Nigeria — *Data Analyst*

DECEMBER 2011 - PRESENT

Collecting, collating, and carrying out complex data analysis to help clients make informed decisions. Also involved in reporting statistical findings to work colleagues and senior managers.

First Atlantic Semiconductors and Microelectronics, Owerri, Nigeria — *App and Embedded Systems Engineer*

DECEMBER 2010 - DECEMBER 2011

Job responsibilities included design and development of Android applications, design and maintenance of the Fasmicro Android App Store, oversight of training and seminars on Android technology.

FUTO Consult LTD, Owerri, Nigeria — *Windows Software Developer*

FEBRUARY 2008 - DECEMBER 2010

Developed various critical data-centric software for use in tracking and reconciling of oil and gas produced within the Niger Delta. These software were developed using mainly Visual Studio, SQL Server and the C Sharp programming language.

EDUCATION

Johns Hopkins University, Baltimore, Maryland — *Data Science Certification*

OCTOBER 2014 - MAY 2015

Federal University of Technology, Owerri, Nigeria — *B.Eng (Hons) Electrical/Electronics Engineering*

SEPTEMBER 2004 - AUGUST 2009

SKILLS

Database administration
Data gathering and cleaning
Exploratory data analysis
Machine learning
Statistical Inference
Developing data products
Regression analysis
Machine learning
Reproducible research
Python, C#, Java, SQL, R

PROJECTS

– Developing mathematical models and software for gas aggregation and allocation to downstream sector of the oil economy in Nigeria.

– Developing instruments for the implementation of the domestic gas supply obligation to the downstream sector of the Nigerian economy.

– Developing a data model for onshore and offshore gas royalty reconciliation in the Niger Delta..

LANGUAGES

English – Very high proficiency in spoken and written from.
